**Subject:** RE: Fact Sheet for CFAC Panel

Mike, I looked at the fact sheet and talked with Mary with Ann Green Communications this past week on the phone to provide some feedback. We discussed the fact sheets and a few other points. They have set up a share site to better coordinate and have access to resources. I will follow up with some written comments as well, likely next week.

Below I've bulleted the public feedback we received (and I was able to capture) at the meeting last week. You may want to add. Attached is the only written comment we received from the meeting

Per our discussion, I am going to ask for Regional TASC support to develop the CIP for CFAC and have talked with folks to get a request submitted. I will send you a draft to look at before I hit send. As you know, this support is not guaranteed. On this note, you wanted me to remind you to include language in a work descriptions for community involvement. This is your reminder ☺

I am headed out of the office to Frenchtown and will be off work tomorrow. I am in M – Th of next week. You have my cell so please contact me anytime. Thanks Mike!

EPA Public Meeting  
CFAC – Columbia Falls  
5 April 2016

Questions:

- What is disadvantage of listing now vs. down the road?
- Who makes recommendations/Decisions to list or not?
- Is listing based primarily on science? Is science the driving force in listing?
- What about CAMU (corrective action management unit)? Will that be done or not?
- When do we expect a Record of Decision?
- When is the RI/FS expected to be complete?
- What are the next steps in developing a Community Advisory Group?
- If we let Glencore clean up the site and find that the cleanup is not to standards, do we have to start over? Why?

Comments/Concern:

- Let Glencore have the chance to clean up. If not, we can list the site.
- If site is not listed and then contaminants are found to be high and there is no \$ to address, it could delay the cleanup.
- Take time to educate the public before EPA asks for comments.
- Concern that the line of credit from Glencore to do the RIFS is not secure.
- Take time, step back and ensure we are moving forward in the right direction. Do not "speed to the finish line."
- Superfund Alternative is same expect for funding.
- "I feel it is the responsibility of the Columbia Falls Mayor and County Commissioner to work on strategies to ensure the Superfund site is portrayed in a positive light, rather than just say they don't want a Superfund site because it will give the community a bad name (received after the meeting).

Requests:

- Examples of economic (business or industry) on NPL sites in MT.

Hi Robert,

We talked about this document last week. Did you get a chance to look at this, can you provide comments to Ann Green soon?

I will be adding my comments tomorrow.

Mike
